SUMMARY

Performance-driven MCA candidate specializing in Cloud Computing and Software Development, offering practical expertise in Python, Java, Machine Learning, and database architecture (MySQL, MongoDB). Demonstrated track record in architecting Edge AI pipelines and secure Flask web applications through Agile workflows. AWS-certified with a strong grounding in DevOps principles and cross-functional team collaboration, focused on engineering scalable, fault-tolerant systems.

SKILLS

Language and Core — Python, Java, HTML5, CSS3
Machine Learning and AI — TensorFlow, OpenCV, CNN, Edge AI
Cloud and DevOps — AWS Cloud Foundation, DevOps Fundamental
Operating System — Linux, Windows
Databases and tools — MySQL, MongoDB, PowerBI, Excel, Git, Github

PROJECTS

IntelliCrop, *Real Time Monitoring of Mushroom Disease Detection.* 06/2026 – Present
Engineered an end-to-end Edge AI diagnostic pipeline to detect crop diseases in real time, reducing inspection turnaround latency to under 200 ms.
Integrated custom image processing workflows using OpenCV and TensorFlow on edge hardware to process sensor streams locally.
Applied DevOps practices to deploy automated model update scripts across edge environments, cutting manual configuration time by 35%.
Maintained active team collaboration across hardware and software workflows using Agile sprint cycles.

Diagnosing Adversarial PACS Image Tampering 📄 02/2025 – 06/2026
Developed a high-accuracy Convolutional Neural Network (CNN) framework to detect adversarial tampering in medical PACS chest X-ray images, achieving 94% classification precision.
Designed and deployed a Flask web platform that processes DICOM images and generates forensic tampering reports within seconds.
Implemented software development best practices, modular system design, and Git-based version control across all release iterations.
Collaborated with peers to benchmark model robustness against multiple perturbation vectors, improving detection recall by 25%.

EDUCATION

Master of Computer Application, Assam Kaziranga University 08/2025 – Present | Jorhat, Assam, India
Pursuing MCA with specialization in Cloud Computing.

Bachelor of Computer Application 10/2022 – 08/2024 | Guwahati, Assam, India
Asian Institute of Management and Technology

Higher Secondary, Anundoram Borooah Academy 01/2019 – 07/2021 | Pathsala, Assam, India

HSLC, Anundoram Borooah Academy 08/2019 | Pathsala, Assam, India

CERTIFICATES

- AWS Academy Graduate - Cloud Foundations 📄
- AWS Educate Introduction to Cloud 101 - Training Badge 📄
